National School Number (NPSN) 69959273 · CEEB 000004 · Accredited A, BAN-S/M Bali Province, 2023

SCHOOL PROFILE 2026–27

The school

A private vocational secondary school specialising in information technology, founded in 2016 by Yayasan Pendidikan Bali Global Denpasar. Accredited A, score 94 out of 100, by the National Accreditation Board for Schools (BAN-S/M), Bali Province, October 2023. Suburban setting. Graduating class of 2027: **212 students** across four programmes. Language of instruction: Indonesian; English is taught as a subject only.

Four programmes: Software and Game Development (PPLG), Computer Network and Telecommunications Engineering (TJKT), Visual Communication Design (DKV), Digital Business (BD). Over 50 industry partnerships.

Understanding the Indonesian vocational system

Indonesian upper-secondary education has two tracks. SMA is the general academic track and leads to university. SMK is the vocational track: three years combining the national core curriculum with an occupational specialisation and a compulsory industrial placement.

The curriculum is fixed, not elected. Students do not choose courses. There is no honours track, no Advanced Placement, no International Baccalaureate and no Cambridge programme available anywhere in the Indonesian SMK system. A student here cannot show ambition through course selection, because no selection exists. Where a student has pursued advanced material, it was done outside the timetable.

The stated purpose is employment. National vocational policy targets direct entry into industry. Our institutional goal is that 90% of graduates enter employment, higher education, or entrepreneurship.

Two graduation requirements with no US equivalent

PKL is a compulsory industrial placement of up to six months in Grade 12, assessed by both the employer and the school. **UKK** is a terminal practical examination assessed against national occupational standards, in part by external industry assessors.

Grading

Marks 0–100; minimum pass 75; working range approximately 85 to 98. A = 93–100, B = 88–92, C = 80–87, D = 75–79, F below 75. No weighting is applied. Academic ranking is computed within each programme of study, not across the graduating class. A Transcript Legend accompanies every transcript.

Testing

Indonesia has no national standardised examination equivalent to the SAT or ACT, and no such test is required for Indonesian university admission from the SMK track. Neither the SAT nor the ACT is taught, prepared for, or administered at this school, and no student here has previously sat either.

Students who take these tests do so at their own expense and on their own initiative, travel to a commercial test centre outside the school, and prepare without institutional support. The same applies to IELTS and the Duolingo English Test. Where a student from this school submits such a score, it was obtained under those conditions.

Outcomes

[percentage entering four-year higher education / diploma programmes / employment / entrepreneurship, class of 2026]

Co-curricular programme

Student council (OSIS/MPK), Web Design, Robotics, E-Sports, Broadcasting, Journalism, Japanese, Scouts, Paskibra, Balinese dance and gamelan, theatre, football, volleyball, badminton, chess. Indonesian secondary co-curricular clubs are teacher-led; students take part as members, and the elected leadership roles common in US high schools do not generally exist outside the student council.

Contacts

Role	Name	Email
Principal	I Made Indra Aribawa, S.H.	
Head of Curriculum	Gede Putu Agustyawan, S.Pd.	
Head of Student Affairs / Counsellor	Ida Ayu Cempaka Putri, S.Pd.	
Head of Administration	I Putu Agus Purnama Adi Putra, S.E., M.M.
